Electric bug Smack

DESCRIPTION:

Twenty years ago, it became a customer favorite. Now it's back.
Meet **SMACK 2.0** – quite possibly the world's coolest electric fly swatter. With its classic look and integrated electric grid, it efficiently takes care of flies, mosquitoes, wasps and other unwanted guests. Unlike traditional fly swatters, SMACK 2.0 is made from a soft and flexible material designed to withstand real-world use. Bend it, swing it and let the electric grid do the rest. It comes complete with two AAA batteries from Varta and is ready for all your summer adventures straight out of the box.
For maximum brand exposure, SMACK 2.0 can be customized with doming logos on both sides. A promotional product guaranteed to become the talk of the office, summer party or patio.
SMACK is back.
