# Qi 15W Phone Stand charger

**DESCRIPTION:**

The future is wireless. This wireless charger with 15W fast charging allows you to quickly charge your Qi-compatible smartphone without any hassle with cables, while the charger assists as a practical stand for your mobile. Perfect for keeping track of the phone in front of the computer on the desk or on the bedside table. Connect the charger to a wall socket, then just place your mobile to start charge wireless. The charger automatically shuts off when your mobile is fully charged, and has an ultra-low energy consumption during standby. The charger has a rubberized contact surface that allows your mobile phone to lie or stand still and charge without slipping around.
