

Solar Hand crank Radio small

DESCRIPTION:

Emergency radio for unexpected situations. The radio has a slim and stylish design with retractable antenna and is small enough to easily fit in a backpack. The emergency radio can receive FM and AM radio and has a built-in flashlight as well as a built-in 2000mAh powerbank . When it comes to the radio's battery power, you have three choices: charge via cranking, via solar cells, or via USB socket. In the event of a power cut, it is best to use the crank if you want to get the battery power up relatively quickly. Charge with the crank/dynamo for about 10 minutes, which gives just over an hour of use. The radio has a USB output that can be used for charging the radio but also other electronic gadgets, e.g. your phone or other devices.
