

SyncStop Adapter (Data Blocker)

DESCRIPTION:

SyncStop prevents accidental data exchange when your device is connected to someone else's computer or a public charging station. SyncStop (data blocker) accomplishes this by blocking data transfer and allowing only electricity to pass. This minimizes the risks of installing malware and theft of data. Use it easily together with your normal cable. Compatible with 99% of the charging cables on the market. Works with both iPhone & Android.

Four alternatives to choose from: USB-A to USB-A / USB-A to Type-C / Type-C to USB-A / Type-C to Type-C
