

Set Mobile Security

DESCRIPTION:

Customized security kit for your mobile! Protect yourself from transparency through the camera hole on your phone or tablet. A super-thin cover that is fastened with double-sided adhesive tape on top of the lens. Opens and closes smoothly and can sit permanently, without being removed. A universal product that fits most of the market's phones and tablets. This together with a SyncStop connector. SyncStop prevents accidental data exchange when your device is connected to someone else's computer or a public charging station. SyncStop accomplishes this by blocking data transfer and allowing only power to pass. This minimizes the risks of installing malware and theft of data. Compatible with 99% of the charging cables on the market, standard USB connector (Type-A). Works with both iPhone & Android. These are delivered attached to standard cards. Custom design on card possible at an additional cost from 500 pcs.
