

# Travel Safe, Travel Secure

Ensure your data is protected whilst on the move with these encrypted portable SSDs from Safexs

- Strong AES 256-bit hardware encryption in XTS-mode
- Fast data transfer speeds up to 200mb/s read and 190mb/s write
- Resets after 5 failed entry attempts
- Alphanumeric keypad
- USB 3.0 (backwards compatible with USB 2.0)
- Works with Windows, Mac, Linux, Chrome, Android, Thin Clients and Embedded Systems

Safexs Firebolt SSD is a hardware-encrypted, robust solid state drive with keypad entry, designed to protect your sensitive data from unauthorised access. This device provides super-fast data transfer speeds and is cross platform to work on all the major computer operating systems. Make sure you aren't the latest data theft victim, order yours now!
